Wednesday 20 April 2005

Frenchs Forest, Sydney NSW

Infomedia is pleased to present the third quarter financial results for FY2005 and a review of recent activities.

Sales Revenue and Net Profit After Tax for the quarter were \$14,761,000 and \$3,327,000 respectively. The Company remains on track to achieve its FY2005 revenue and profit guidance of \$56 – \$60M and \$13 – \$15M respectively, before significant items. As anticipated, Electronic Parts Catalogues subscriptions declined by 3.6% over the period. However, with contributions from other company products, sales revenue for the quarter remained comparable to Q2. Further, the Ford European dealership subscription reductions were partially offset by the growing subscriptions of Microcat® to Toyota European dealers and increased sales across all franchises within North America.

The Company paid a fully franked interim dividend of 1.7 cent per share on 23 March 2005 to shareholders of record at 9 March 2005.

The Company continued to rollout Microcat® for Toyota dealers in Europe and the transition of the PartsImager® EPC to Microcat, for General Motors and Saturn retailers located in the United States and Canada. In Australia, Microcat for Holden was also successfully launched as the successor to the Company's PartFinder® system. Microcat also saw its first entry into the Puerto Rican market.

Infomedia and Telstra announced and launched the collaboration of the first eBusiness solution between the companies. Starting with Toyota parts, motor

vehicle repairers and parts suppliers across the nation are now able to access parts interpretation and ordering online 24 hours a day, 7 days a week using the Microcat® MARKET™ system. The Company is currently marketing the use of the system to other automakers.

Superservice Menus™, the Company's latest success in the franchised dealership sales channel, continues to gain momentum both domestically and internationally. Subscriptions for the period grew by 15% over the previous quarter. After the first international sale to Daihatsu dealers within the UK, Hyundai has now been added as a European automaker with the solution being first released in Sweden. Other markets for Hyundai are queuing for releases during the upcoming months.

The 2005 Lube & Tune Guide™ was released during the quarter and added 150 new models and an expanded range of specifications. The guide is also available now via CD-ROM or via the internet.

About Infomedia Ltd

Infomedia is one of the world's leading developers and suppliers of electronic parts catalogues (EPCs) for the automotive industry globally. Infomedia also provides a range of other services and solutions including dealer management systems and the researching, processing and publishing of technical data for the automotive and oil industries.
